HAZMAT/Solid Waste

We regulate solid waste facilities and assist businesses handle hazardous materials safely and in compliance with the requirements of state and federal regulations to protect human health and the environment.

Mission

We provide quality public health services using regulatory and educational tools to prevent disease and injury by eliminating or minimizing environmental health hazards.

Land Use & Water Resources

We regulate and consult with the public and other involved departments to assure that land use practices are planned and community facilities are designed and operated consistent with good environmental health practices in order to protect human health and the environment.

Consumer Protection

We regulate a variety of facilities (e.g. retail food, water recreating, rental housing) through on-site inspections, complaint inspections, plan and construction review, and education to satisfy the health and safety code requirements in order to reduce the risk of disease and related injuries in our community.
